Office Action Summary

DETAILED ACTION

The abstract of the disclosure is objected to because it is not limited to a single paragraph and it includes such legal phraseology as "means" (lines 2, 4, 8 and 12). Correction is required. See MPEP § 608.01(b).

The specification is objected to for the following reasons:

1. The word "works" used throughout the specification is improper and it should apparently read -- food products -- or -- foods -- (see, for example, the last line of the abstract).
2. Pages 3-13 of the specification are objected to since they make reference to the originally filed claims 1-16 which can obviously be substituted by new amended claims in an amendment to be filed by applicants. Cancellation of reference to claims 1-16 in the specification is required.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention for the following reasons:

1. The words "works" and "work" used throughout the claims are improper and misdescriptive. The change of "works" to -- food products -- or -- foods -- would obviate this rejection.
2. While the preamble of claims 1-3 calls for a smoking method, claims 1-3 fail to recite a positive manipulative step of treating food products within the chamber with smoke to

Art Unit: 1761

thereby manufacture smoked food products (see page 1, lines 3-13 of the instant specification).

Thus claims 1-3 are indefinite and incomplete.

3. It is not clear what is intended by "so as not to start discharge" as recited in claims 1-3 and 5-7, last line of each.

4. Claim 4 is improper in the recitation of "the adjacent electrode plate". Note that no antecedent basis has been established in claim 3 or claim 4 for "the adjacent electrode plate" recited in claim 4, lines 2-3."

5. The phrase "anyone of claims 1 through 3" recited in claim 4, line 1 is improper. The change of this phrase to -- any one of claims 1, 2, and 3 -- would overcome this rejection.

6. The limitation "adapted to transport" recited in claim 5, lines 5-6, and the limitation "adapted to support" recited in claim 6, line 3 are indefinite. The change of these limitations to -- for transporting -- and -- for supporting -- would obviate this rejection.

7. The word "adapted" recited in claim 5, last line is indefinite and superfluous and it should be deleted.

8. The phrase "anyone of claims 5 through 7" recited in claims 8-10, 12, 14 and 15 is improper. The change of this phrase to -- any one of claims 5, 6, and 7 -- would overcome this rejection.

9. Claim 8 is improper in the recitation of "the adjacent electrode plate". Note that no antecedent basis has been established in claim 7 or claim 8 for "the adjacent electrode plate" recited in claim 8, lines 3-4.

10. Claim 11 is an improper multiple dependent claim because a multiple dependent claim cannot depend from any other multiple dependent claim, either directly or indirectly. See MPEP section 608.01(n).

Claims 1-16 are free of the prior art.

Claims 1-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The Lieberman patent is cited to show a method of smoking food products. The Hanley et al patent is cited to show a process of smoking meat.
